Dr. Joshua Otaigbe has been awarded a prestigious 2019-2020 Jefferson Science Fellowship by the National Academies of Science, Engineering and Medicine. ABOUT THIS HANDBOOK: Handbook of Organic Electronics and Photonics brings together chemists, materials scientists, physicists, and engineers from both academia and industry to share information on the organic materials for emerging new electronic and photonic technologies. If a molten linear polymer (such as polyethylene) is cooled down rapidly, then the orientation of its molecules, which are randomly aligned, curved and entangled remain frozen and the solid has disordered structure. Biodegradable Polymers: -Biodegradable polymers are a special class of polymer that breaks down after its intended purpose by bacterial decomposition process to result in natural byproducts such as gases (CO_2 , N_2), water, biomass, and inorganic salts., Polymer Handbook.
